

Inver-X Cordless Pool Cleaner

Next Generation Cordless Pool Cleaner.

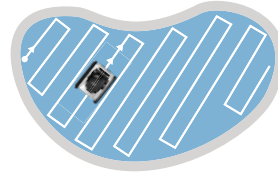

Inver X Cordless Pool Cleaner has no cable, no caddy and is completely rechargeable. Using i-Mapping Technology to efficiently clean pools of any shape.

Not only is it suitable for all pool finishes it can also climb vertical surfaces, even Perspex. The built in AI and Freedrive technology means it will avoid obstacles and can navigate the pool floor, walls and waterline accurately and efficiently.

Our cleaner stands out from its competitors, everything from its sleek design, TurboSilence Full-inverter Technology and its ability to clean the pool with ultimate precision, this cleaner is taking the market by storm.

Our lives are so busy now and this technology has been adapted to work in line with that. You get maximum clean time for very little charge time; also you can pre-program the cleaner to clean at various intervals and it is safe to leave in the pool while swimming so provides maximum convenience to the user.

You can rely on it to perform, and it eliminates all the hassle that comes with corded and lower endurance models.

Powered by i-Mapping Technology, offering full coverage and straight cleaning path, giving excellent results

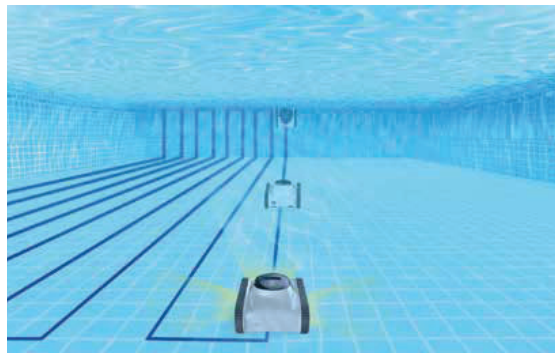

Features

Operated by 3DC motors

With precise coordination of 3 DC motors the core control system coordinates the running power of the three DC motors between 20%-100% (averaging 50%), working in sync to create longer endurance.

Patented 3D S path

With built in AI the Cordless Pool cleaner uses its precise Gyroscope motion sensor and 6 probes to gather spatial data to plot the path it will take for each clean. It can spatially detect objects it will need to avoid, and its self-developed algorithm is continuously analysing, working the pool with its anti-bump skill and 90° turning. This method will save you 60% cleaning time!

App operation

Before the Robot goes into the water you can set the desired programs from your Smart phone or tablet, you don't have to think about it until it is ready to be recharged. Plan your cleaning cycles from the comfort of your sofa.

Magnetic basket is easy to remove

Delay timer function and holiday mode

Alternatively using the buttons on the cleaner you can pre-program cycles to perform at set intervals and leave the cleaner in the pool even when it is not cleaning.

This means you can rely on the cleaner to perform whilst you are away from your property, and you will arrive home to a pool that hasn't missed a clean and is ready to swim in.

No maximum pool size

Unlike other cleaners on the market, you are not restricted by the size of your pool or the length or inconvenience of an attached cable. Each model performs the to the same high standard, the only difference is the battery life, so it just comes down to the endurance you require for a specific level of cleaning. The bigger the pool the more battery will be used, but also depends on how often you will need to clean the pool. Things to consider, whether the pool is indoor or outdoor, residential or commercial, covered or uncovered, season and number of swimmers using the pool.

Powered by rechargeable battery

Technical features

- Avoids obstacles using built in AI
- Charging time from 2-5hrs
- Long battery life from 3-8hours
- Choice of pre-programmed cleaning times – 30mins, 1 hour and 2 hour
- Auto-clean every 24,48 or 72 hours for up to 5 days or more*
- Timer-delay function
- Can be managed via the App, to offer a higher degree of cleaning options tailored to you
- Navigates using i-Mapping and Freedrive technology
- Comes with a hook for easy removal from the water
- Magnetic basket collects leaves and small debris
- Pool size is not restricted by cable length, its cordless
- Filter capacity 3.2L
- Can be set to clean floor only or floor/walls and waterline
- Travels at 12m/min

** Dependant on pool size, mode and battery capacity of model*

Model	X30	X45	X60	X80
Suggested pool size	15-30m ²	15-40m ²	20-50m ²	30-70m ²
Endurance time	3h	4.5h	6h	8h
Charging time	2h	3h	4h	5h
Battery	5.2AH	7.8AH	10.4AH	14AH
Cleaning mode	Floor only / Floor & Wall & Waterline			
Cleaning time circle	0.5/1/2 hour			
AI mode	Every 1/2/3 days circle cleaning (Auto start)			
Cleaning path	3D S cleaning path			
App	Yes			
Other function	Auto stop at poolside after cleaning			
Weight	10.4kg	10.9kg	11.4kg	11.5kg
Warranty	2 year robot + 3 year battery			

“The cleaner will effortlessly climb the walls of all surfaces, including Perspex!”

Model	Max Endurance	Ocea RRP (ex Vat)
X30	3 Hours	£999
X45	4.5 hours	£1,199
X60	6 hours	£1,399
X80	8 hours	£1,699
