

A500 NHL SKIMMER

DESIGN RANGE

Specially designed for unobtrusive integration, the A500 NHL skimmer raises the water level to just 45 mm below the base (linerless version).

The gap between the water level and the coping is practically invisible, almost making it an infinity swimming pool.

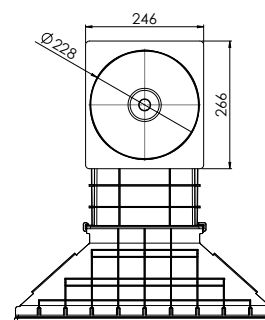

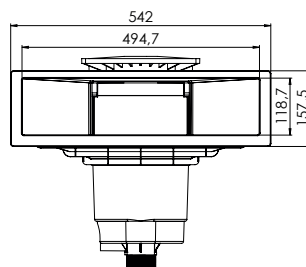

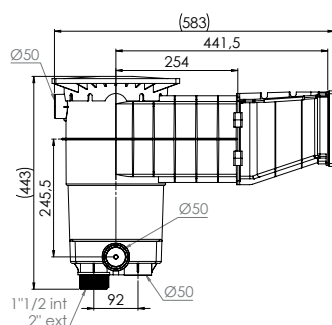

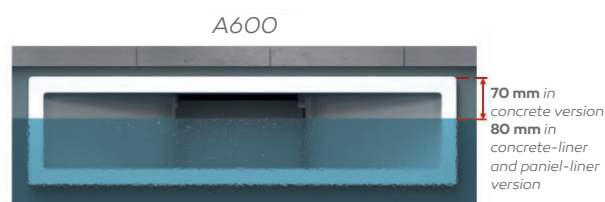

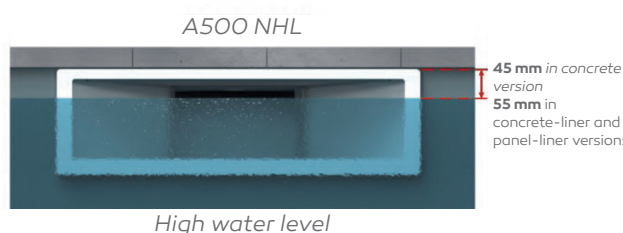

Rebar not supplied
(Ø12 mm max)

best-seller

No interruption of the liner

- ABS, UV-resistant
- Suction fitting: 1 1/2" internal thread, 2" external thread or Ø 50 mm to be glued
