PASSION SPAS PROFESSIONAL DESIGN

Breathtaking spa designs with exceptional seating comfort

At Passion Spas, designing great spas is our specialty and our passion. We go to great lengths to ensure that every detail of the spa contributes to your comfort and creates the ultimate relaxation experience. The pleasing lines of the spa shell are both attractive and functional, providing strategic locations for lighting, jets, and features. Controls are within easy reach, seat contours and depths provide maximum comfort, and there are a variety of seating options in each spa for your enjoyment. Beautiful waterfalls, LED lighting, and aromatherapy are only some of the features we include to enhance your spa experience. Your Passion Spa is a work of art designed to deliver functional beauty to your home or backyard.

PASSION SPAS PHYSICAL THERAPY

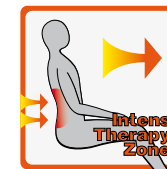

Passion Spas offers the most innovative spa massage features ever developed

Physical Therapy. Each Passion Spa has a variety of massage features that will create the ultimate in hydrotherapy relief for you. Through years of experience and close cooperation with physiotherapists, we have designed a variety of massage experiences that are unique to Passion Spas.

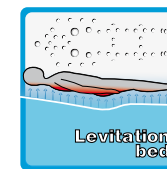

Aqua Rolling Massage™

Our exclusive Aqua Rolling Massage pushes water up the back of the seat through specially designed recesses in the spa shell. The resulting agitation of the water creates a vigorous massage that works the muscles throughout your back.

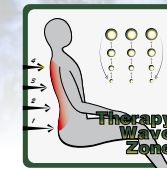

Intense Therapy Zone™

The Intense Therapy Zone™ provides a concentrated, penetrating massage to the lower regions of your back. The intensity of the pressure can be adjusted. Only Passion Spas offers a therapy system for your lower back muscles that allows you to isolate specific areas with the intensity of massage you desire.

Levitation Bed™

The Levitation bed is the most innovative spa massage feature available. Experiencing this massage will give you a floating sensation because your body is completely enveloped in a soothing massage that can be adjusted for intensity and effect. You can lie either face down or face up, giving you a

Therapy Wave Zone™

The Therapy Wave Zone is a massage that starts at the

lower back, and slowly works its way up from your lower back to your shoulders and neck. The sensation mimics a cushioned rolling pin running up and down your back, soothing your muscles as it works its way from your lower back to neck.

Waterfall Massage™

Imagine a continuous stream of cascading, warm water falling

gently on your neck and shoulders. This is the sensation you experience when enjoying the delightful effects of our innovative Waterfall Massage. When finished, you will exit the spa with your upper back and neck feeling totally and completely relaxed.

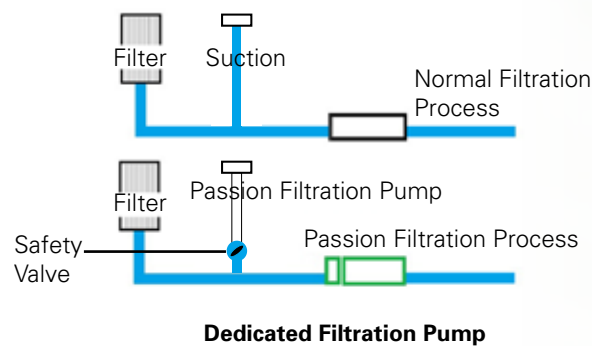

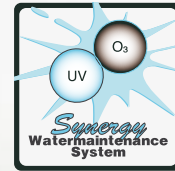

PASSION SPAS PERFECT WATER

Amazingly clear water due to our synergy water purification system.

Passion Spas are equipped with a multi-faceted water purification system that helps keep your water crystal clear and reduces the need for additional water sanitation and maintenance. The sole purpose of our dedicated filtration pump is to draw water through the spa filter, insuring that your spa water is constantly being filtered regardless of whether the massage pumps are operating. The water is sanitized by means of our highly effective Ozone System and, in our Signature and Exclusive Collections, further purified with our UV sanitation system. The combination of 100% filtration, ozone sanitation and UV purification creates our Synergy Water Maintenance System that creates the ultimate in clear water.

PASSION SPAS PLANET FRIENDLY

Award winning Hybrid Heating technology for exceptional energy efficiency.

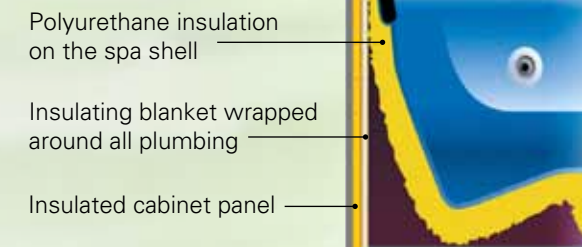

While you are enjoying your Passion Spa, you are being a good steward of both your budget and the environment.

Passion Spas are designed to reduce energy consumption through a variety of innovative features. Hybrid Heating technology supplements the heat produced by the electric heater.

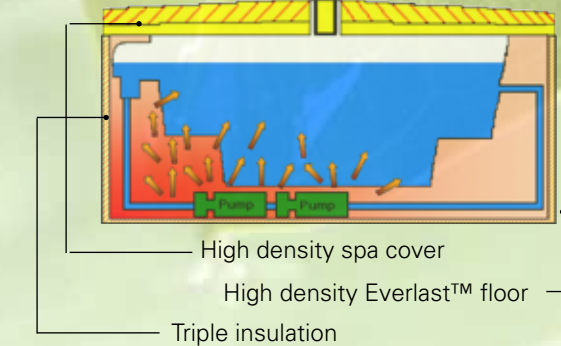

Specially designed massage pumps agitate the water molecules through friction, which generates heat, thereby easing energy consumption by the heater. Our programmable controls allow you to set the times when your spa will turn on and off, and the low-wattage filtration pump uses only a small amount of electricity to keep your water sparkling clean. Triple layer insulation, extra thick walk-on safety cover and Everlast™ floor support shroud your Passion Spa with one of the most effective heat containment designs available.

PASSION SPAS PRECISION ENGINEERING

Design and construction that make Passion Spas the best in structural integrity.

Passion Spas are designed to perform and built to last. Quality components and precise manufacturing combine to create one of the most fully featured and innovative spas available. Our acrylic shell is reinforced with vinyl-ester resin laminates that are applied by hand. The shell is supported by a durable synthetic support structure that will ensure that you can enjoy your spa for years to come. The entire base of the spa is enclosed with our Everlast synthetic floor support, providing integral seat supports and structural integrity. Passion Spas deliver superior design, quality components, and experienced craftsmanship in a spa that will provide you and your family with years of enjoyment.

PASSION SPAS PROTECTION FOR YOU

Product support for today, tomorrow, and as long as you own your Passion Spa

At Passion Spas, we build great spas and value long-term relationships. We want you happy with your spa today, tomorrow and in the future. Our experience in the spa business allows us to design and build great spas, using only the best components, and backing our spas with exceptional support to our dealers. To that end we select dealers who share our commitment to customer relationships. We then work with our dealers to provide the support they need before and after the sale. Enjoy your Passion Spa knowing that we will be here with the expertise, experience and dedication needed to support you in the years to come.

Full specification page 31

Passion Spas is the only Swim Spa manufacturer in the world to offer Current-Lift Technology, enabling the swimmer to remain prone on the water surface at any degree of current intensity.

The Fitness Collection of Swim Spas is designed to provide an authentic swimming experience that adjusts to the intensity of your workout. Our innovative Current-Lift technology was developed by Passion Spas and automatically adjusts the water current to the intensity of your workout. As you decrease the force of the upper two swim jets, the lower swim jets automatically increase in intensity, creating more "lift," providing more buoyancy as your swimming speed decreases. The faster you swim, the less lift if needed from the lower jets and the flow is directed to the upper jets for a stronger current. Swim Spas in the Fitness Collection also include Rowing Gear, Access Step and Synergy Water Maintenance System as standard features.
