

Weekly Maintenance Guide

Backwash Filter

1. Switch off pump.
2. Depress lever on multiport and turn to “Backwash” position.
3. Open backwash waste valve (if fitted).
4. Switch on pump.
5. Run for approximately for 3 minutes. The dirty water will be passing through the sight glass on the multiport, which will gradually clear when the filter is clean.
6. Switch off pump.
7. Move lever to “Rinse” position.
8. Switch on pump.
9. Run for approx. 30 seconds.
10. Switch off pump.
11. Return to “Filter” position.
12. Switch on pump to recommence filtration.
13. Close the backwash line (if fitted).

Empty skimmer baskets and pump strainer basket.

Test and treat water (see other guides).

Record results and work done.

All guides and service record sheets are available from any of our showrooms.
